JUDGE O'REAR

Opens Campaign with Eloquent Speech.

HIS WARNING TO VOTERS

Says Democratic Party Dominated By Machine-People Had No Choice in Selection of Candidates-Urges Citizens To Vote Regardless of Party Affiliations-Special Interests Need Attention - Liquor Question Dis-

Judge E. C. O'Rear, the Republican candidate for Governor, opened the campaign at Elizabethtown, Ky., on Monday, August 14, before an immense crowd, which gave him the closest attention. He sounded the keynote of this campaign as being whether the people or the interests should control the State's politics, and then discussed the County Unit question, the Bradley election and the question of his own resignation from the Court of Appeals pending his candidacy for Governor. The demonstration in approval of to him and his friends. He spoke as

The principal issue in this campaign is, Shall Kentucky cleanse the not exceptional in having the political triumph of intrigue in her legislative exceptional if her condition had been different from that of the other States. But she is not. She will be exceptional only if she makes no attempt to throw off the domination of the unclean elements in politics.

When we call for a more popular government, for restoring to the people the misused powers of government, it is because we believe that in the people only is the requisite virtue and strength to rid the politics of the State of its alien and demoralizing influences. The slogan therefore should be, Shall the people of Kentucky rule Kentucky? And the aim of the campaign should be to produce clean politics in order that we may have cleaner and therefore more efficient government. It is my purpose to center the campaign there.

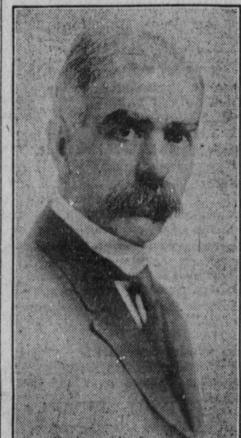

There never was an issue in this country whether clean or unclean politics should prevail. That is to say, when unclean politics did prevail, and an attempt was made to purify conditions, no party ever joined the issue and declared in opposition that unclean politics was better for the State and should consequently be continued. The fight has many times been made It has never been made without justification in the conditions. Whether it has succeeded depended always on whether the people got their eyes open to and kept them upon the actual conditions and the real issue. The opposition always denies the existence of unclean conditions, or if they are so obvious as to be beyond denial, then the attempt has invariably been to deflect the public attention from the real issue; to introduce collateral or immaterial or irrelevant issues; to attempt to draw the public away from the main fight, and have the battle pitched on side questions. In Kentucky this year the attempt has been, and will continue to be, to withdraw the main question from the people's consideration, and to allure them to him, certain members of the commitgrounds less vulnerable, or presenting a better chance for success. The opposition in Kentucky will try to have you believe that something else is of more importance to you than a debate of and the eradication of the evils which enthrall, control and bind Kentucky to a course damaging to her standing abroad and to her growth and power at home

That the State has been boss-ridden, machine-ruled and lobby-controlled, to the public detriment and shame, is the first question of fact to be settled. The next question will be the remedy. Dominated By Party Machine.

Four years ago, to go no further back, it was asserted, and upon full Kentucky was dominated by a party machine. Senator McCreary declared upon the stump in his campaign lobby, as to that particular race. The you see that even if there was a maagainst Governor Beckham for the Senstorship that such was the fact. ment, tried it out. Perhaps other causes made his defeat inevitable, without the machine. But Mr. Edwards for Lieutenant Governor and Mr. Laffoon for Auditor had ample opportunity for testing its working qualities. Senator Blackburn came back to warn his party friends of the presence and power of that machine. He declared it was here and at work. He declaimed against its danger to good government. It was on that ground that he contested the nomination of Mr. McCreary and those elected by his machine for places on the State ticket. The warnings seem to have had the contrary effect from that intended. It was hoped to arouse the voters in the Democratic party to a sense of party peril, as well as danger to the State. The voters, however, had found by long and bitter experience, that a fight against the machine, with the machine conducting the election, was a hopeless task. Hence they stayed away from the election. Only about thirty per cent of the Democrats of the State participated in the primary, according to the face of the returns. while if the padding done in Louisville and the Big Sandy region, not to mention others, be subtracted, not more than twenty-five per cent voted.

A party machine is more than a name. Its existence can not be determined merely upon assertion. It implies a number of persons in power in office, State or party offices, who by Judge O'Rear's speech was gratifying virtue of their power and influence can control and do control the party's action, more or less regardless of the will of its voters. Thus it has been that the great interests have grown so enormously in this country. They are Democrats where the Legis-lature is Democratic, and Republicans where it is Republican. Their agents are known as lobbyists. They are partisan, bi-partisan and omni-partisan. They are always genial, kindly, courteous and corrupt. They are cunning and quiet. They hate noise, and light, and the confusion of public discussion. Their ways are furtive, their influence sinister, their power corroding. If these gentry should be curtailed in their activities two results may be expected—one, the campaign fund, so dear and so necessary to the maintenance of a party machine, is cut off; and the other, the people's representatives in the Legislature would be untrammeled by the influence of that body in enacting laws. My notion is to abolish the professional lobby. They are asessed in every State and legislative campaign for political purposes, and they pay. In return they get immunity as against the constitution. They prefer to contribute to the election of State Senators (there are fewer of them), then of Representatives, and lastly to the State executive officers. They are determined at whatever cost that that section of the constitution of Kentucky (Section 61) shall not be carried into effect by legislation. In spite of campaign after campaign in which that issue has been presented in electing Legislatures, and in spite of emphatic majorities pledged to the county unit and the constitution, the Legislature has not acted. The liquor interests have defeated it - to the shame of Kentucky-have controlled the Legislature for twenty years, and that against the constitution and the people. A power such as that is dan-gerous. Well may politicians tremble at its menace, and certain big newspapers dance to its music. A power that is to be feared is a power also to be courted by those who fear it more than they dare it.

Let us clear away first some confusing and misleading statements of those who are today openly fighting the battles of the liquor interests in this campaign. They charge that Statewide prohibition is the issue. That is not true. It is not even proposed by our party as an issue, and could not be adopted except by an amendment to the constitution. Everybody knows that no such amendment is proposed. Nor is it the issue whether a man should be allowed to drink if he

wants to. It is not at issue whether sobriety or total abstinence shall be forced on people as a legal instead of moral status.

The whole issue is whether the constitution shall prevail on this subject. Whether as to the retail liquor business the constitution shall be a dead letter.

Whether prohibition is wise or unwise as a policy, whether partial or total prohibition should pravail, are utterly beside the question. For however one may think as to those things, the question still comes back. What shall be done with the constitution? Is it tolerable that any interest may have the constitution nullified as to it because the constitution is not thought to be wise? If so, then the interests which are monopolies could maintain that Section 198 of the constitution which deliberately plans to plunder a a value as an instrument of protection strange that anyone could be found to seriously dispute it.

You will have observed that I have apparently assumed in this discussion that the constitution requires that the county shall at some time be the controlling unit in voting out the sale of liquor by retail. It would not be fair debate to make any such assumption if it were really an open question. I do not think it is open. However, certain learned newspaper men have taken the opposite position. They assert, and will (I take it) the constitution means that the pretion. They say my declaration is fraudulent, and the construction false. I will not bandy epithets. They are neither evidence nor argument. Conceding to my adversaries even honesty of purpose and a desire to state the question in its true aspect, I must nevertheless maintain my declared construction of the constitution-a construction which has also been characterized as dogmatic. My own opinion, in view of my interest in my own candidacy, might be taken by the public with allowance, however good my opportunity for having formed an accurate opinion on the subject. The construction which I assert to be the correct one is, it is true, my opinion as a man and a lawyer. It is shared, I know, by many others more capable as constitutional lawyers. Still, that would leave the question an open one for discussion, if that were all. The opinion shall from time to time be more fully elaborated in these debates so that the public may have the amplest opportunity for weighing it on its merits. But today I go no further than to say that the construction for which I contend is the construction placed on the section by the Court of Appeals of Kentucky - the supreme judicial tribunal of this State - that tribunal to which is confided by the constitution and laws of the State the final, conclusive decision of such quescase—in a number of cases, in fact bound to settle. It was settled after sumption, and that I alive today is fully studied it, and who presented Now I weigh 187 pounds and have every one of the arguments against open will and strong for years.'

provision of the constitution means, to what source must the public look for enlightenment? To interested parties? To politicians having a race at stake? To newspapers seeking a political issue, or serving the objecting liquor trade? Or to that court which you have established for the settlement for you of just such controversies? I will not maintain that the courts are infallible, even in their construction of laws; nor that thereafter the public may not refuse to accept their opinions as conclusive when further legislation is proposed. But I do maintain that so long as the opinion of the court stands, it is the law of the land, and is sufficient justification for any man's assumption that that construction of the constitution is the correct and legal construction. If the , political representatives of the Democratic party assembled to write a platform

unanimous judgment of the court. If

ting the question of party expediency first, that is their privilege, to be sure. In that event, I will feel called upon, and will undertake, to defend the court's construction as the legal construction, as the logical construction, and as the best policy for the State to adopt, even if the constitution were silent on that point. But the liquor interests will not abide the decision of the question adversely to themselves, no matter who decides it. If the Legislature so declares the law, it is attacked as unconstitutional. If the courts sustain the legislation, the courts are denounced and the members maligned. If the executive officers undertake to enforce the laws thus enacted and construed, these interests defy the officers, violate the law, and

seek to debauch justice. Then they unblushingly assert that the law is impolitic because it can not be enforced. Then they attempt to appeal from the Legislature, from the constitution, and from the courts, by packing political committees, manipulating conventions. and finally by corruption, by a hired press, by the boycott, to elect a body of magistrates who will enact and construe the laws as they demand. It is this interest, reckless of means and indifferent of all save its own ascendancy, which has controlled the politics and legislation of Kentucky for more than a quarter of a century, and which is now proposing to continue that domination, which is leading as well as backing the fight against our ticket.

It may not matter so much to the peo-

They know full well that party platforms, public speeches of candidates, even party and personal pledges, are impotent if they can maintain their position of vantage. Clean legislation can not flow from a polluted source. Remove the pollution from the fountains of political power, and all other reforms are possible. But not otherwise.

Whether Kentucky will undertake that kind of cleaning up is the ques-tion. Whether you will follow the course of New Jersey and California ridden by political bosses and made to serve powerful monopolistic interests -or whether you will allow a continuance of those conditions, is the supreme matter.

This campaign is to unfold that program. Hear not alone one side, nor one speech. Hear all. Then decide for Kentucky's honor, and progress.

O'REAR MAKES STATEMENT

On the Bradley Election and Resignation Question.

EVIDENCE IS LACKING

That portion of Judge E. C. O'Rear's opening speech at Elizabethtown which dealt with Senator Bradley's election and with the question of his own resignation from the Court of Appeals while making the race for Governor on the Republican ticket is as follows:

Notwithstanding our platform was adopted more than a month ago, and that its provisions were in the main set forth in the announcement of my candidacy four months ago, not one journal or speaker of the opposition has assailed any one of those planks as unsound or undesirable, save the county unit plank. True, certain gentlemen aspiring to nomination on the Democratic ticket took a fling at the proposed platform, but as they were defeated in their own party it would seem that their criticisms were not

well received. This silence of the Democratic press and speakers, including nominees, is significant. Especialy is this true when it is viewed in the light of the treatment by that press of our ticket. You have observed that all their denunciation has been directed at me personally. The effort is to destroy the public's confidence in me; to make it appear that I am untrustworthy and insincere. I can not believe this is because of any personal malevolent feeling toward me; that I of all men in the Republican party in Kentucky who have been nominated for this high office am so woefully deficient in character and so dangerous in tenden-The true reason appears to me to be that as our platform is invuinerable, is an advanced presentation of live subjects in keeping with the public good and the popular demand, it is necessary, in order to destroy our chances of winning, that the ticket be discredited. And as I made my canvass before the Republicans upon these identical policies, and was because of them overwhelmingly chosen to head the ticket, my destruction would best insure the defeat of our ticket. It is therefore this bitter, personal, partisan attack is made upon me. My position as a member of the Court of Appeals for the past eleven years has given me great opportunity for serving the State well or bad. In that, my learning as a lawyer was not more important than my character as a man. Yet none of these papers have thought that I was unfitted to serve you in that high and important office. This tardy assault now indicates not only that it is without foundation in truth, but is insincere, and rested alone upon a sinister purpose. Collateral issues must be introduced to carry out the plan of the opposition, them so as to distract attention from the true issues. Hence the interpolation of immaterial issues. I do not mean to imply that my own sincerity and uprightness as a man and as a public official are immaterial, but that the efforts resorted to so far to establish that fact are. Of these, the two most harped on by the press are my allusion to Senator Bradley's title and my failure to now resign my office as Judge, pending the campaign.

Of the first, I have this much to say: My training and habit of mind are to presume every man innocent of crime until at least there is some substantial evidence to the contrary. That is not only the course of law, but is the only decent way of treatment of the matter. It has become a common practice in this country to accuse the highest public officials of the basest criminal purposes without any the imputation of corruption. evidence and without any foudation in fact. We need not stop now to inquire why this is so; it is enough that it is a fact. Yet those of us who undertake to make public and responsible statements on the subject ought at least be free from that national weakness. I begin, therefore, with the presumption that this high official, representing Kentucky in the Senate of the United States, is as guiltless of crime in procuring his office as his distinguished colleague or any other member. This presumption should stand until there is contrary evidence. That he was elected by receiving the votes of four Democratic members of the Kentucky Legislature, in addition to all the Republican members, is well known. There has been no suggestion that the support of any one of the Republican members was procured by corruption. It is only as to the Democratic votes that this accusation is now hinted at. I have no knowledge whatever that any of them was corrupted, nor have I ever heard of an iota of evidence to sustain the intimation. On the contrary, I had supposed that those members who voted for Mr. Bradley did so in order to defeat Mr. Beckham, and that they finally voted for Mr. Bradley for that purpose alone. It will be remembered that Mr. Beckham and Mr. McCreary had just made a race in the Democratic primary for the nomination for United States Senator. Beekham pitched his campaign on the question of putting the liquor trade out of politics in Kentucky. He had, as Governor, advocated a county unit law, and had procured a partial one to be passed. He had deeply offended the liquor interests in Kentucky by that fact, and had incurred their bitter enmity. They opposed him solidly, with their money and votes, supporting McCreary. But Beckham was declared the nominer The liquor interests, true to their not lcy of accepting nothing as settled that was not settled their way, kep up the fight in the Legislature. Their chief organ then, as now, the Courier Journal, editorially advised the Democratic members to bolt Mr. Beckham's nomination; counseled his defeat as a

fitting pun'shment for his so-called

By taint it is understood the the Legislature exemplified exactly use of corrupt means, such as bribery the Courier-Journal's political attitude, in obtaining his title. Now I want which was to defeat Beckham, and go one step further and say that thereby further the liquor trade's in those who would accuse upon mere terests. That may have been bad poli- suspicion and condemn by innuendo tics, or bad taste, but it was not per have any knowledge of corruption in se corrupt. Among those who bolted that election, they should state it, and Mr. Beckham were, besides the four produce the evidence; they should put that afterwards supported Mr. Brad-ley, Mr. William F. He was nominated and elected, and did not resign as Judge until about five months after had the power to do so is not doubted. his election. He was not criticized for that. Mayor Head, of Louisville, and Judge Reed, of Paducah, the latter a Circuit Judge and a gentleman of delicate sense of honor and unblemished reputation, became candidates for Governor. Neither resigned, nor was it suggested that they should. Mr. Johnson, a member of Congress, came a candiate for Governor. He did not resign. Mr. Ollie James, a member of Congress, is now nominated for U. S. Senator, and is running for that ofwith Mr. McCreary. I took this to fice. He has not resigned, and no newspaper has suggested that he should.

I have noticed but two instances where nominees for higher offices resigned the ones they held when nominated, in order to prosecute their canvasses free from the imputation of greediness implied in the criticism I am noticing. One was Judge Robert Riddell, who, while Circuit Judge, was nominated for Judge of the Court of Appeals. He resigned. He was also defeated. The other was Judge Alton B. Parker, of the Court of Appeals of New York, nominated for President. He resigned as Judge, and was likewise defeated for President. The majority of precedent is not to resign It also appears to be unlucky. Besides. the criticism in this instance does not strike me as being sincere. My distinguished opponent also holds an office of power and dignity, perhaps of some profit also at times, which he is neither requested nor expected to resign. This election will terminate my career as a Judge of the Court of Appeals of Kentucky. You need have no fear of that. The only question is who should appoint my successor until the people can elect one. The court will not convene again until the latter part of September. It is now up with its docket. My absence for five or six weeks will not interfere with the public's business before the court. The only imposition involved will be that of a little more labor for that time on my colleagues, who, I am happy to believe, would not in the least begrudge me that usual and simple courtesy. In the allusions I have made to my distinguished opponent, no criticism s intended. His long public career is familiar to all Kentuckians, and I would say nothing to disparage whatever merit he has displayed, or to detract from his standing as a party man. I have intended only to state the conditions which have prevailed in

On the third morning after the plotters had plotted the wind was due east, with a promise of strengthening. The trio set out gayly, but upon reaching the waterside Mrs. Denham suggested a picnic on solid ground, and Mr. Blum favored getting a livery rig for a drive over highways.

Youth and innocence prevailed, however. After the first five minutes Mrs. Denham said there was nothing about sailing to scare a babe, and Mr. Blum laughed and rubbed his hands and said a life on the ocean wave for him. Corrosion in Metals.

Corrosion in metals is said to be prevented by the passage through the metals of a weak current of electricity. This is a "like cure like" treatment, for the pitting of the metals is said to be due to the local electrical action, that is, feeble current developed by the acidular water on dissimilar metals, often impurities in the metal itself, at the point of corrosion.

BIG DAY DURING KENTUCKY STATE FAIR SET ASIDE IN THEIR INTEREST.

A Kentucky community without one or more candidates, present or prospective, for a state or district office, is a sad community indeed. In old Kentucky, according to tradition, children are taught political dogmas with their prayers. But add to the great host of candidates for the more important offices the army of those seeking city, or county, positions and a force will be brought together sufficient to drive both Madero and Diaz,

The decision, therefore, to have one day of Kentucky State Fair week set aside to be known as Candidate's day is certain to meet with vociferous approval and there need be no fear of a record breaking crowd for the day on

BUTTER AWARDS WILL TEMPT THE FARMERS

NEW DEPARTURE PROVIDED, AT SUGGESTION OF EXPERI-MENT STATION.

Especial attention will be given this year in connection with the Kentucky State Fair to creamery butter. The management desires to encourage this industry in Kentucky and it has been decided that creamery butter, honey and sorghum molasses will be placed in the horticultural department. Heretofore it has been a part of the field, seed and grain department. The horticultural department always is one of the most interesting at the big fair, and not alone to the residents of the rural sections, and the addition of these displays will increase the interest materially.

Members of the state fair board express the opinion that a more important feature than that of creamery butter will be hard to find and the display is expected to be such as to evidence the lead which Kentucky has taken in this phase of agricultural en-

INNOVATION FOR POPULAR NINTH ANNUAL STATE FAIR.

"I'LL BE THERE; WILL YOU?"

Slogan For All Kentuckians Is Adopted By Management-Perry's Victory on Lake Erie.

Dozens of new departments and attractions which have been created by the state fair board for the coming 9th annual state fair do not by any means constitute all of the inducements to the public to attend, as a proposition which caps the climax for generosity has been finally decided upon. That is to admit the public to the big horse show at night in the pavilion free of charge. To be exact, the only requisite for admission to this show, one which will include dozens of horses which have carried off premiums in the most exclusive shows in the country, will be to buy a ticket for admis sion at the gate. In the past an extra admission fee of 25 cents has been charged for the privilege of the horse

The only exception to this rule will both linen and commercial. those not wishing to pay an extra will be pleased. quarter, even though the horse show will be worth double that sum, may see it in perfect comfort by occupying free of charge any of the seats not reserved to be sold.

For Kentucky's Benefit.

As a result of this and other induce ments, the greeting, "I'll be there; will you?" is expected to be heard on all hands prior to and during fair week. By the way, there is a good deal of real patriotism embodied in this expression, "I'll be there; will you?" when it is heard in connection with the big show which is being prepared for the people of Kentucky This will not be a fair for the material benefit of one man or set of men. Many business men are giving up their time, and going to much trouble, without recompense of any character, in order to make the fair a suc-

Tens of thousands of dollars will be paid out to Kentuckians in premiums, the industries and resources of the state will be helped and the citizens given an opportunity to see and learn, at a cost of fifty cents each, more than could be seen or learned under such circumstances anywhere else in the country except at a similar institution. Therefore, when a Kentuckian along about the time state fair week approaches is heard giving his neighbor this greeting, he is interested in encouraging the exhibition of the products of his home state and he

is entitled to all credit. The Kentucky State Fair is developing each year more and more into a place where friendships are renewed, relatives are met, voters are corralled and conventions of all characters held. In the past the convention tent has been located at an out-of-theway place hard to find and poorly located. Secretary P. M. Shy has decided this year to locate it to the left
